NEW MATERIAL TECHNOLOGY CO. LTD., and
JIANTONG WANG,

Defendants.

INDICTMENT

The Grand Jury charges that:

GENERAL ALLEGATIONS

At all times relevant to this Indictment:

Protonitazene and Metonitazene

1. The United States is experiencing an opioid overdose epidemic. Opioid overdose is the leading cause of death for Americans between the ages of 18 and 49. Between 2021 and 2022, over 160,767 Americans died from opioid-involved overdoses. In 2022, the reported number of drug overdose deaths involving synthetic opioids continued to increase compared to the previous years.

2. The introduction of synthetic opioids into the illicit drug market threatens to exacerbate the overdose problem. Protonitazene and metonitazene are two such synthetic opioids that have pharmacological profiles similar to those of other scheduled opioids and they are subject to abuse in the same manner.

3. Protonitazene and metonitazene are listed Schedule I controlled substances. There are no approved medical uses for protonitazene and metonitazene in the United States, or anywhere else in the world. Drug traffickers typically mix protonitazene and metonitazene with other opioids, such as fentanyl, to create new and more powerful cocktails of dangerous opioids. In certain instances, metonitazene was identified as the sole opioid detected in overdose autopsies.

4. Synthetic opioids like protonitazene and metonitazene are manufactured and distributed by China-based chemical companies, many of which openly advertise on the internet. These China-based manufacturers ship synthetic opioids around the world, including to the United States, where drug dealers often combine them with other opioids and/or further distribute them to individual end users. These China-based chemical companies often attempt to evade law enforcement by using re-shippers in the United States, false return labels, false invoices and packaging that conceals the true contents, such as using dog food bags. These companies also used fraudulent postage to conceal the true identity and location of the shipper and to avoid payment of shipping costs.

The Company Defendant

5. Defendant **JIANGSU BANGDEYA NEW MATERIAL TECHNOLOGY CO. LTD.** (“BANGDEYA”) is a pharmaceutical company located in Jiangsu, China that manufactures, amongst other things, synthetic opioids.

6. The following image was taken from the **BANGDEYA** website:

7. **BANGDEYA** advertises openly online as an export company for chemicals, including protonitazene and metonitazene. A simple open-source internet search reveals multiple advertisements for the sale of these controlled substances from **BANGDEYA** sales representatives. These advertisements contain contact information such as WhatsApp numbers, Wickr monikers, or email addresses. **BANGDEYA**, through their own website, a host of storefront websites, and social media platforms, has advertised to customers in the United States, Europe, Asia, and South America.

8. The following are screen shots for two of BANGDEYA's online advertisements for the sale and distribution of protonitazene and metonitazene:

9. Since as early as April 2022, **BANGDEYA** has shipped protonitazene and metonitazene from China to the Southern District of Florida. These controlled substances were sent to a known drug trafficker based in Deerfield Beach, Florida, and to undercover federal agents.

The Individual Defendant and Co-Conspirators

10. Defendant **JIANTONG WANG**, a/k/a “Jack,” was a citizen of China and an owner and operator of **BANGDEYA**. Over the past 18 months, **BANGDEYA** and certain of its executives and employees, including **JIANTONG WANG**, a/k/a “Jack,” sold and shipped more than six kilograms of metonitazene and nine kilograms of protonitazene into the United States, specifically into the Southern District of Florida.

11. Co-Conspirator 1 was a citizen of China and a sales representative for **BANGDEYA**.

12. Co-Conspirator 2 was a resident of Deerfield Beach, Florida.

**The Defendants’ Importation and Distribution
of Protonitazene and Metonitazene to Co-Conspirator 2**

13. Co-Conspirator 2 was a drug trafficker who sold fentanyl in distribution quantity amounts to other drug traffickers in South Florida.

14. Beginning in late 2021 and continuing through mid-2023, Co-Conspirator 2 sought chemicals to mix with fentanyl and heroin in order to increase his supply of opioids and to enhance their effects on consumers. Through an open internet search, Co-Conspirator 2 found advertisements for metonitazene and protonitazene from **BANGDEYA**. Co-Conspirator 2 began ordering these substances from **BANGDEYA** sales representatives, including Co-Conspirator 1, via WhatsApp. Co-Conspirator 2 made payment in Bitcoin to cryptocurrency wallets held in the name of **JIANTONG WANG** that were provided to Co-Conspirator 2 by **BANGDEYA** representatives.

15. Co-Conspirator 2 ordered 300 to 500 grams of protonitazene and/or metonitazene each month from **BANGDEYA**. In sum, **BANGDEYA** sold and distributed more than four kilograms of protonitazene and metonitazene to Co-Conspirator 2 in the Southern District of Florida. Co-Conspirator 2 would then mix the protonitazene or metonitazene with fentanyl or heroin and sell the ultra-powerful substance in South Florida.

16. On or about October 22, 2022, law enforcement in the Southern District of Florida seized a parcel sent from **BANGDEYA** intended for Co-Conspirator 2. This parcel contained 172.3 grams of protonitazene.

17. On or about June 15, 2023, Co-Conspirator 2 was arrested in the Southern District of Florida. During a search executed at the time of Co-Conspirator 2's arrest, agents found 8.734 kilograms of controlled substances containing a mixture of opioids. Co-Conspirator 2 mixed several different opioids and pressed them together. The resulting mixture was a powerful and dangerous combination of protonitazene, metonitazene, fentanyl, fluorofentanyl, and heroin.

The Undercover Transactions and Distributions from BANGDEYA

18. Beginning on or about January 26, 2023, an undercover agent began negotiating with **JIANTONG WANG** regarding the purchase of synthetic opioids. **WANG** stated that **BANGDEYA** was willing to distribute three such chemicals, including metonitazene, protonitazene and bromozolam. As part of that negotiation, agents asked for verification of safe shipping to the United States. **WANG** provided the undercover agent two U.S. Postal Service tracking numbers. A review of those tracking numbers revealed that the parcels were destined for the State of Georgia.

19. On or about February 2, 2023, agents in Georgia seized one of the parcels shipped by **JIANTONG WANG** on behalf of **BANGDEYA**. A search of the parcel revealed 453.59 grams

of protonitazene.

The February 22, 2023, Distribution

20. On or about January 29, 2023, the undercover agent continued negotiations with **JIANTONG WANG**. The undercover agent asked whether **BANGDEYA** had safe shipping. **WANG** stated that **BANGDEYA** has “100% clearance delivery” and would “re-ship the goods to you for free of charge in case of transportation problems.”

21. On or about January 30, 2023, the undercover agent asked **WANG** if his protonitazene was the yellow powder. **WANG** responded by replying with the below image of two large bags of yellow powder:

22. On or about February 3, 2023, the undercover agent ordered 100 grams of protonitazene. **WANG** replied that the price was “\$1,200 for 100 grams.” **WANG** provided several ways to send payment, including a Bitcoin wallet address that was determined to be held in **WANG**’s name.

23. On or about February 22, 2023, agents received a parcel sent by **BANGDEYA** to an address in Hialeah, Florida. The parcel contained 101.6 grams of protonitazene.

The April 28 and July 7, 2023, Distributions

24. Beginning on or about April 4, 2023, and continuing through April 5, 2023, the undercover agent negotiated with **JIANTONG WANG** for 250 grams of protonitazene from **BANGDEYA**. **WANG** provided the same Bitcoin wallet address for payment as previously used for the February 22, 2023, distribution.

25. On or about April 28, 2023, agents received a parcel sent by **BANGDEYA** to an address in Weston, Florida. The parcel only contained 50 grams of protonitazene.

26. After the undercover agent told **JIANTONG WANG** that only about 50 grams were received, **WANG** sent another parcel. **WANG** explained that “this is a replacement 200 grams” of protonitazene.

27. On or about July 7, 2023, agents received a parcel from **BANGDEYA** sent to an address in Weston, Florida. The parcel contained 202.4 grams of protonitazene.

The May 16, 2023, Distribution

28. Beginning on or about April 14, 2023, and continuing through on or about May 1, 2023, an undercover agent negotiated with **JIANTONG WANG** for the purchase of 530 grams of protonitazene from **BANGDEYA**.

29. On or about April 21, 2023, agents sent payment using Bitcoin to a cryptocurrency wallet held in **WANG**’s name.

30. On or about May 16, 2023, agents received a parcel sent by **BANGDEYA** to an address in Weston, Florida. The parcel contained 529.9 grams of protonitazene.

The United States Postal Service

31. The United States Postal Service (USPS) was an agency of the executive branch of the United States government responsible for providing postal services. The USPS was explicitly

authorized by Article I, Section 8, of the U.S. Constitution.

32. The United States Postal Inspection Service (USPIS) was the law enforcement arm of the USPS whose mission was to support and protect the USPS, enforce the laws that defend the nation's mail system from illegal or dangerous use, and ensure public trust in the mail.

33. The USPS offered many postal services, including the delivery of parcels. All parcels required evidence of appropriate valid postage prior to delivery.

34. One type of parcel delivery service offered by the USPS was known as the Electronic Verifications System or "eVS." This system allowed USPS customers to pay postage and document deliveries remotely using electronically uploaded files.

35. To participate in the eVS mailing system, the USPS customer applied for and was assigned a unique Mailer ID or "MID." The MID was used to print postage associated with that particular USPS customer, and the MID was incorporated into the printed postage meter stamp affixed to the parcel.
